Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argued the control process taught by the prior art is the reverse of that claimed by the present application. The examiner stated the argument was likely persuasive for the method claims but not the apparatus claims but agreed to further review the argument. Applicant also argued changing the location of the Leiter diaphragm to the location taught by Stankewitz would prevent the Leiter reference from functioning as intended. The examiner stated this argument appears to be persuasive but reserved judgment until the applicant fully explained the argument in the next submission.
